

## List of next generation immunodeficient mice

<b>NOG-HLA-A2 Tg</b>	
Strain name	NOD.Cg-Prkdc<scid> Il2rg<tm1Sug> Tg(HLADd-A2)/Jic
Strain description	Enhanced human cellular immune responses
Strain development	In 2010, from Professor Hiroaki Ikeda of Mie University (currently Nagasaki University), the HLADd-A2 Tg mouse strain in the background of C57BL/6 and BALB hybrid was introduced to CIEA, and was backcrossed to NOG.
Research application	Reconstitution of human cellular immunity
